PROJECTS

Expense Tracker React App → link

- Developed a responsive web application using React.js for tracking expenses.
- Implemented features such as adding/deleting transactions, calculating income and expenses, and a theme toggle for light and dark modes.
- Added theme switching option

Dotes Manager → link

- Created a notes manager that will manage your daily notes and tasks.
- Ensured the manager is responsive and functions smoothly across different devices.
- Real time notes update , delete and add functionality

Agency Website → link

- Developed a responsive agency website using React.js, implementing reusable components for efficient and scalable development.
- Utilized React Router for seamless navigation and optimized performance with state management using React hooks
- Integrated custom styling with CSS modules and optimized the website for fast load times and smooth user experience.
